Lifemaxx – Professional fitness equipment since 2004

Since 2004, we have been designing and supplying professional fitness equipment for gyms, personal training studios and functional training spaces across Europe. What started as a small family business remains one today, and has grown into a trusted partner for fitness professionals who value quality, reliability and smart design.

Our extensive product range is built to perform in demanding training environments. Every product is developed with a clear focus on durability, functionality and design, without losing sight of affordability. We believe great equipment should not only perform at the highest level, but also fit seamlessly into modern training spaces.

With over 30 years of experience in the fitness industry, we go beyond supplying fitness equipment alone. We advise, design and install complete gym concepts: from a single fitness race zone to large-scale commercial facilities. We have a fully operational in-house R&D department, where new products and training solutions are developed and tested in close collaboration with gyms, trainers and athletes.

As a family-run company, personal contact, clear communication and reliable service are at the heart of everything we do. Whether you are building a home gym, expanding a PT studio or launching a full-scale fitness facility, our dedicated team is ready to support you, every step of the way!

Our own brands

CROSS *maxx*®

High intensity, high volume and heavy loads — Crossmaxx® is built to handle it all. For years, Crossmaxx® has been a trusted name in functional fitness, weightlifting, powerlifting and fitness racing environments, both in daily training and at competitions and events.

From heavy-duty rigs to dumbbells, barbells and benches, our range covers everything needed for serious functional and strength training environments. Crossmaxx® equipment is developed with uncompromising durability, stability and reliability in mind, even under constant, heavy use. A raw, robust design is combined with bold colours, giving every box or gym a powerful, professional look.

Modular rig systems form the core of the range, fully expandable for functional fitness, fitness racing and high-intensity training. The collection also includes a dedicated outdoor line with weather-resistant finishes, enabling durable outdoor training zones for bootcamps and functional fitness.

We continuously refine our products based on real-world use, athlete feedback and evolving training demands. The result: equipment that performs today and is ready for tomorrow.

Our own brands

LMX.®

Style, versatility and performance come together in LMX.®. Developed by Lifemaxx as a distinct brand, LMX.® is recognised for its refined aesthetic, combining sleek black with bright, distinctive colours. The result is high-performance equipment that enhances both training and the visual appeal of any gym.

With a versatile range including racks, barbells, benches, weights, yoga and pilates equipment, accessories, essentials for group classes and functional training tools, LMX.® is designed for personal training studios, group classes and modern commercial gyms.

Each product is built for intensive use, with a strong focus on durability, detail and finish. LMX.® delivers long-term reliability without compromising on design, creating training spaces where athletes feel motivated and ready to perform.

LMX.® BOXING

LMX.® Boxing brings energy, power and variety to any training environment: from high-intensity group classes and HIIT circuits to focused boxing workouts at home. The range includes punching bags, pads, gloves and protective gear, all designed to handle repetitive, high-impact use.

Built from durable materials with reliable protection and a clean, functional design, LMX.® Boxing is perfect for dynamic classes, conditioning sessions and boxing-inspired workouts. Accessible for beginners, tough enough for commercial gyms, and versatile enough for home training. Always with safety, performance and enjoyment at the core.

LMX.® Yoga & Pilates

Yoga and Pilates are essential disciplines within today's fitness landscape, offering a holistic approach that supports both physical performance and mental balance. For gyms, personal trainers, boutique studios and wellness-focused facilities, they are a valuable addition to any training concept.

Through yoga and Pilates, members develop strength, flexibility, stability and body awareness, while also improving posture, mobility and recovery. These disciplines complement strength and functional training perfectly, helping to create balanced programmes that reduce injury risk and support long-term progress.

Lifemaxx offers a carefully developed range of professional yoga and Pilates equipment designed for intensive use. From durable, non-slip yoga mats and essential accessories such as straps and blocks, to premium Pilates solutions like the LMX.® Harmony Pilates Reformer. Built with a stable aluminium frame and an ultra-quiet carriage, this reformer delivers smooth, controlled movement and can be fully adjusted to suit both the user and the workout.

Whether you are equipping a studio, expanding your gym offering or creating a dedicated wellness space, Lifemaxx provides high-quality yoga and Pilates equipment that combines functionality, comfort and refined design.

LMX.® Reformer Pilates

Reformer Pilates is a refined and effective training method that focuses on control, strength, mobility and balance. Using spring-based resistance, it allows for low-impact yet highly challenging workouts that support both performance and recovery. This makes Reformer Pilates a perfect match for the Lifemaxx philosophy: functional, durable and thoughtfully designed equipment that supports long-term training quality. The LMX.® Harmony Pilates Reformer is

developed for professional studios, gyms and home users who value comfort, precision and reliability. Its sleek aluminium frame, ultra-silent carriage and fully adjustable components ensure smooth, controlled movement in every session. Built for intensive use and supplied with a complete set of accessories, the Harmony Reformer offers endless training possibilities for beginners and advanced practitioners alike.

Crossmaxx® Rigs

Crossmaxx® Rigs are versatile, heavy-duty rigs that can be fully customised to suit your training space and goals. Thanks to their modular design, almost anything is possible, from compact setups to complete, multi-station training structures. This flexibility makes Crossmaxx® Rigs an essential element for gyms, boxes and studios of all sizes.

The rigs are available in both free-standing and wall-mounted configurations. When drilling into the floor is not an option, our specially designed base plates provide a safe and stable alternative. Alongside a wide range of fixed rig setups, we also offer fully customised solutions. You can select the components you need and design a rig that perfectly fits your space and training concept. Our team is happy to support you throughout the process and advise on the best configuration for your gym or box. As the central eyecatcher of your training space, every Crossmaxx® Rig is built to be as strong as it is visually impressive.

All components are designed for professional use, combining durability, stability and a raw, functional aesthetic.

The Crossmaxx® Rig XL uprights are built to last, featuring a 3 mm wall thickness, a robust 75 × 75 mm steel profile and laser-cut numbering for easy positioning of attachments. In addition to the classic matt black finish, the uprights are also available in custom RAL colours. This allows you to align your rig with your gym's branding, create visual zones within your training space or stand out with a unique look, without compromising on strength or durability.

Looking to design your complete gym or box? Our gym design team translates your ideas into a detailed 3D layout and advises on how to make the most of your available space. For more information about Crossmaxx® Rigs or support with setting up your gym or box, feel free to contact us.

Crossmaxx® Outdoor

Bring your (home) gym or box outdoors

Bring your (home) gym or box outdoors. With Crossmaxx® Outdoor, you can easily expand your existing gym, introduce new training concepts or even start a completely new outdoor gym or box.

Outdoor training has grown rapidly in popularity. With the Crossmaxx® Outdoor range you can offer a wide variety of challenging and engaging workouts to a growing audience. All components and complete setups are specifically designed for safe, durable and efficient outdoor use, built to withstand intensive training and changing weather conditions.

You can fully customise your outdoor rig by selecting individual components, or choose from one of our proven complete setups. We offer both free-standing models and a range of container-based solutions, giving you the flexibility to create an outdoor training space that fits your location, concept and business goals.

As always, our team is happy to share its knowledge and experience to help you design and realise the perfect outdoor training solution.

Rubber flooring

Sound and vibration reduction

THE NEW DIMENSION IN ACOUSTIC dampening mats

Our puzzle-shaped, acoustic dampening mats: the ideal solution for sound and vibration insulation, as well as floor protection under rubber tiles. The floor is perfectly suitable for gyms and private use with fitness equipment. The material can withstand heavy loads. In almost every situation, this product is the solution against noise and vibration nuisance. They are exceptionally durable thanks to the properties of Expanded Polypropylene, a sustainable raw material that is fully recyclable. The material even meets Foodgrade standards.

Sprintracks

Sprintracks are an effective way to upgrade your gym and increase its versatility. Our eye-catching sprintracks are ideal for sled training, sprint work and other forms of high-performance and functional training. Designed for durability and intensive use, sprintracks are a valuable addition to any type of gym, from commercial fitness centres and performance gyms to functional training studios.

With a wide range of standard sprintracks and the option for fully customised designs, we offer solutions tailored to your space, layout and training concept. From length and width to branding and lane markings, every detail can be adapted to your needs.

Would you like advice or want to explore a custom sprintrack for your gym? Our team is happy to help!

Gym design

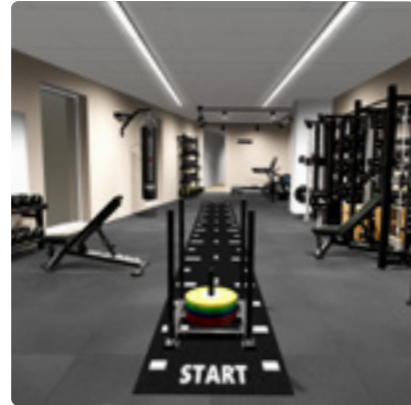

From home gym to professional fitness center - we can design and install your dream gym in three steps!

Perfectly designing and equipping your gym is important to get the very best out of your training space. A beautiful, sleek and efficiently designed training space can make the difference between a nice gym and an amazing gym! With our three-step gym design program, we provide clear and professional advice about everything that comes with setting up or refreshing your training facility.

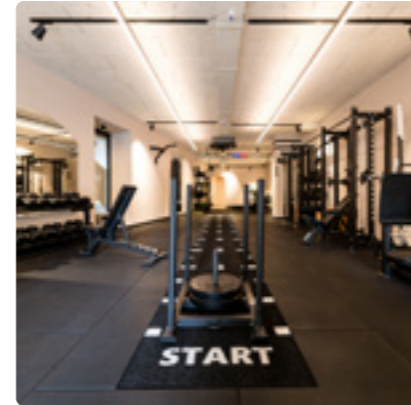

STEP 1 Research and advice

The first step is to sit down and get to know you, your space and your vision. We discuss what you want and how we can help you realize this. If needed, we will be happy to visit your location (within the Netherlands /Belgium) or we will request more pictures. This allows us to take even better account of any special features such as sloping walls, low ceilings or pillars. Once we have fully understood your wishes and the possibilities for your training space, we will provide you with professional advice.

STEP 2 Gym design

Based on our initial conversation and our advice, we will start making your personal 3D visuals. With this personal 3D design, we can give you all options and a realistic picture of the look and feel of your gym. In this step we will also see if all your wishes will fit in the available space. Our experts keep in mind to have enough space to move around, to train and to keep sufficient space available for storage of equipment. Together with our expert you will create the most suitable layout for your gym.

STEP 3 Delivery & installation

The third and final step is the delivery and installation of the equipment on a date that suits you. Our professionals ensure a smooth delivery, so you don't have to worry about anything! All you have to do now is (re) open your doors and help your members become the best version of themselves!

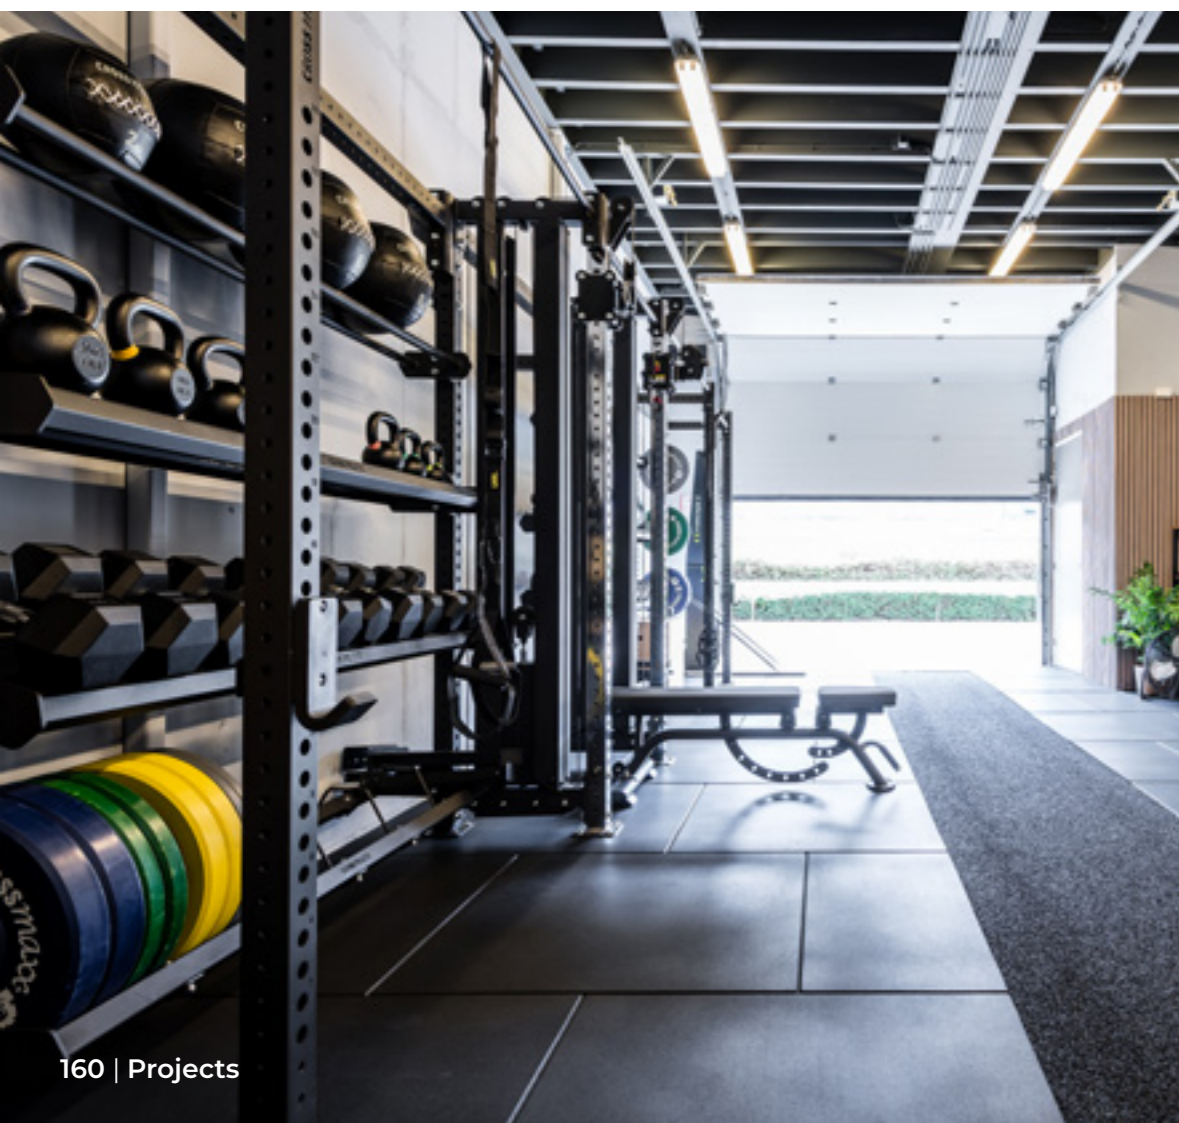

Feel free to contact us to see how we can design your ideal training space together.

Projects

Corporate Social Responsibility

We care

As part of the fitness and health industry, we care about the wellbeing of both our customers and our employees. Our goal is to find the right balance between people, the environment and economic responsibility. By continuously improving our processes, we aim to reduce our ecological footprint and operate in a more sustainable way.

We believe it is important that our customers can trust that Lifemaxx products are developed and produced with respect for people and the environment. Whenever we see opportunities to improve, we take action within our capabilities.

Responsible production

We work with long-term partners and trusted factories. By visiting our suppliers annually, we ensure proper working conditions and responsible production processes. Whenever possible, we produce locally while remaining competitive.

Our factories are monitored twice a year to assess environmental impact and identify opportunities for improvement. For example, several cast iron factories now use electricity instead of charcoal for melting processes. Products are packed using recycled cardboard, and our warehouse is located close to the Port of Rotterdam to help reduce transport-related emissions.

Daily operations

We continuously work on improving our working environment, with a strong focus on employee wellbeing, diversity and sustainability. Our building has been made more energy-efficient, for example by fully switching to LED lighting.

Sustainability also plays an important role in our transport and logistics. Orders are delivered by transport companies using EURO 6 vehicles, or by our own installation team operating EURO 6 vehicles. Within our warehouse, we actively focus on recycling, reducing waste and maximising the use and re-use of sustainable materials.

Our role in society

We believe that being a responsible company also means contributing to society. Lifemaxx supports various charities through annual donations to organisations that help both people and animals.

One example is our Pink Ribbon campaign, during which special pink barbells were sold. Fifty percent of the proceeds were donated to Pink Ribbon, supporting research, treatment and aftercare related to breast cancer and its long-term effects.

"The people working within Lifemaxx B.V. vary in age between 18 and 75 years."

"Throughout our entire building, all lighting is LED lighting."

"We have an in-house fitness where all people working at Lifemaxx B.V. can do their workout."

"We provide fresh fruit at work every week."

Phone:

+31 (0)10 415 9800

When ordering please provide us with the following information:

- Full invoice- and shipping address
- VAT number if applicable
- Product codes and description of the products you wish to order
- Method of payment

Prices:

- All prices exclude VAT
- All prices exclude optional delivery charges

Delivery:

- We can deliver the order to you by parcel, pallet or Lifemaxx delivery service
- Delivery charges can be requested via info@lifemaxx.com.

Lifemaxx delivery service is not available for orders outside The Benelux.

Warranty:

All Lifemaxx products are manufactured with our utmost care and craftsmanship. If any defects may arise, the following warranty regulations apply. Lifemaxx products have a standard 1 year warranty period, with some exceptions:

- 2 year warranty on all Lifemaxx® PU products.
- 6 months warranty on all cable attachments, all inflated materials, vinyl coated materials, all balls and bags.

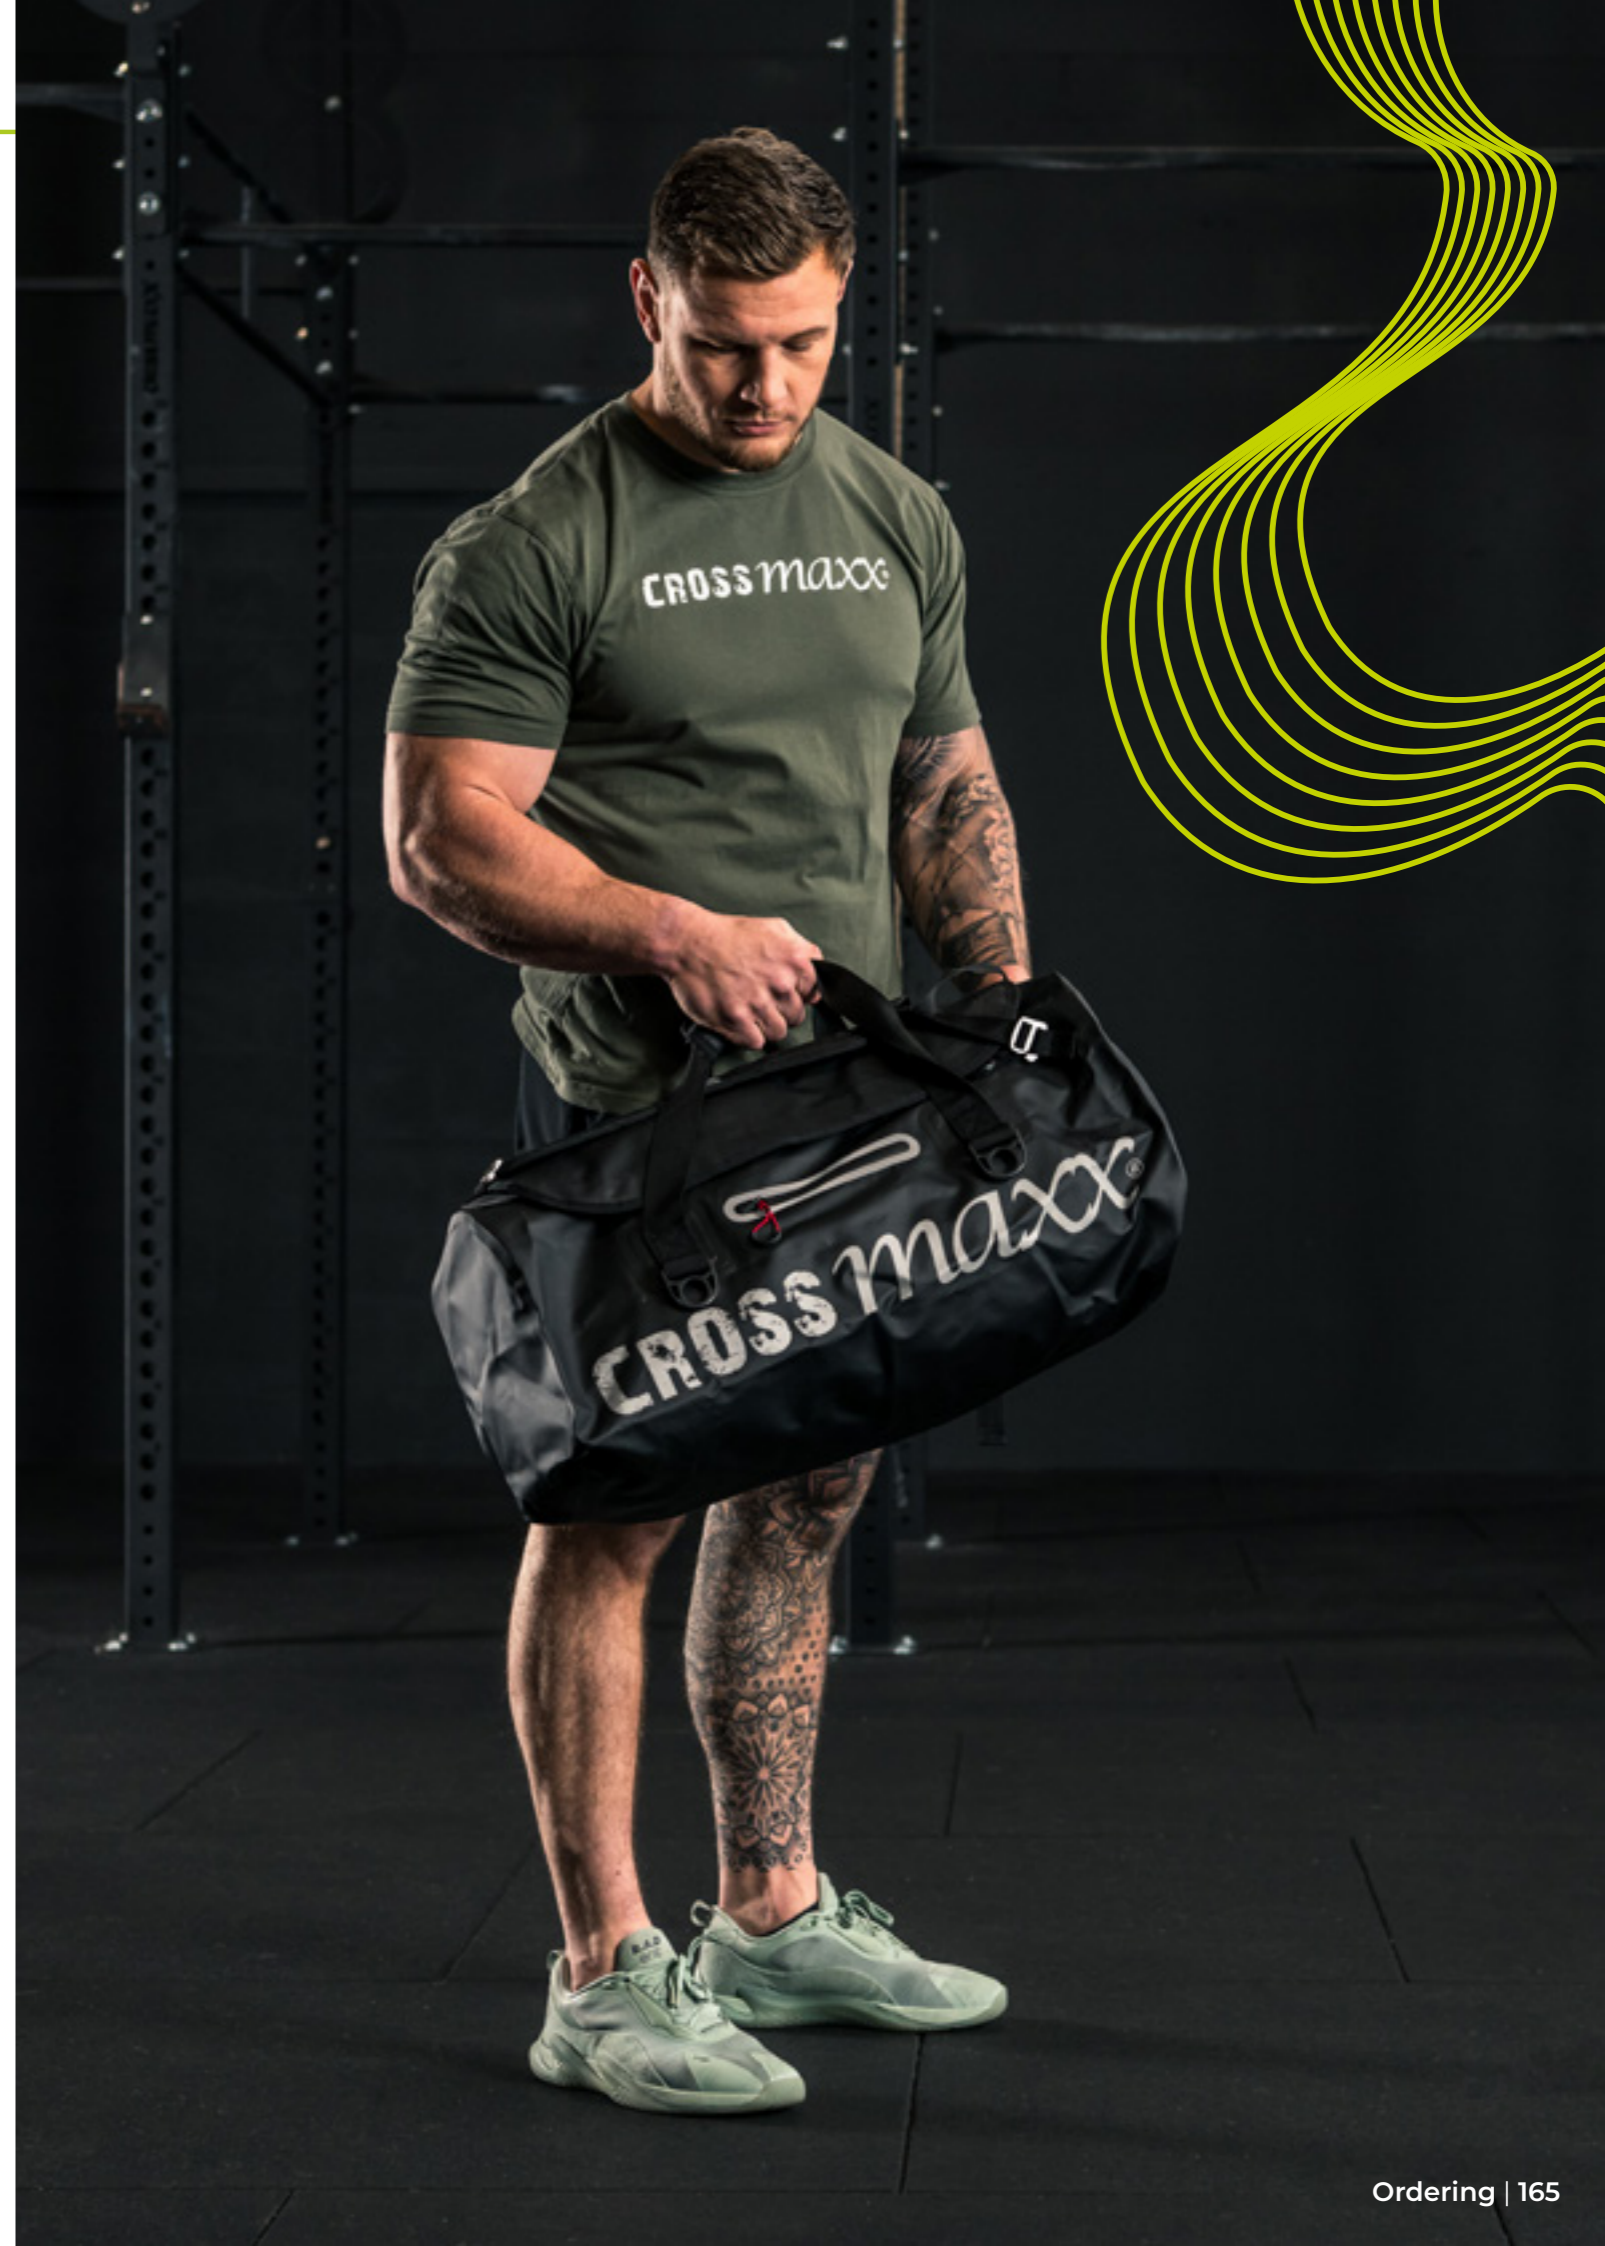

- 3 months warranty on all elastic materials, all jump ropes and aerobic mats
- No warranty on LMX.® Boxing products, neck support rolls and ankle straps.

If problems arise within that period, Lifemaxx will repair or replace your product. We may request photographic evidence or will ask you to return the product to us for inspection. Lifemaxx will not accept responsibility for defects arising from the misuse of any goods, or problems that arise outside the control of Lifemaxx.

Not covered by the warranty (and tips to increase the lifetime of your products):

- Any damage resulting from use with racks not sourced from Lifemaxx. For example rubber dumbbells should be stored on Lifemaxx dumbbell racks which feature saddles to increase the lifetime of the products.
- Damage resulting from slamming or inflating products which are not designed for these purposes. For example medicine balls are not made for slamming or inflating.
- Damage resulting from throwing or dropping products that are not designed for this purpose. For example dumbbells, discs (bumper plates excluded) and kettlebells are not designed to be dropped.
- Damage resulting from excessive loading when the product is not designed for this. For instance some bars are suitable for lighter use and cannot bear heavy loads for some exercises. See product description on website for more information.
- Our Crossmaxx® rigs must be bolted to the floor for safe use.

For our full terms and conditions, please visit our website www.lifemaxx.com

Need help?

Are you planning a home gym, new personal training zone, weightlifting area, fitness race zone, company gym or a complete commercial gym or box? Or do you have questions about our products? Our experienced and dedicated team is happy to support you every step of the way.
